

**ACTIVE & RELAX –
create your own
individual mood.**

SEE THE WORLD IN A NEW LIGHT

OSRAM

Live ACTIVE! Feel RELAX!

**The right light for
any application.**

Anyone who has ever sat down to a romantic dinner knows that lighting is important for creating the right atmosphere. And because we like to create different moods to suit different situations there is now a choice of ACTIVE or RELAX lamps from OSRAM.

**Bring mood lighting
into your home.**

**OSRAM ACTIVE – for an
energising atmosphere**

Wherever your family is active – in your home office, in children's bedrooms or in the kitchen – wherever you have to work or focus on detail, the fresh daylight colour of the ACTIVE lamp will help you concentrate and make your furnishings appear in fresh natural colours.

Crystalline prism-like micro-particles in the coating on the ACTIVE lamp reduce the amount of yellow in the light and help ensure your home is bathed in fresh natural white light.

OSRAM RELAX – for a cosy relaxed atmosphere

The warm atmospheric light from RELAX lamps will add an extra element of relaxation to your dining area, to your living room and to your bedroom. Thanks to the excellent colour rendering of these lamps, the character of your furnishings will be retained. Your home will just look cosier.

The special effect of the RELAX lamp is achieved by a special coating with gently contoured micro-particles.

Micro-particle-coating – another innovation from OSRAM.

ACTIVE & RELAX – brilliant benefits:

ACTIVE – for an energising atmosphere

- Natural white light
- Improves contrast
- Bright and glare-free
- Ideal for aiding concentration
- Ideal for adding sparkle and life to furnishings

RELAX – warm light for relaxing

- Warm atmospheric light
- For unwinding and relaxing
- Unlike dimmed light
- For creating a cosy atmosphere
- Ideal for complimenting the natural appearance of furnishings
