

Our forecast  
for Christmas:  
White. Snow-white.

The new LED garland –  
flicker-free snow-white light

SEE THE WORLD IN A NEW LIGHT

**OSRAM**

# Dreaming of a white Christmas

As Christmas draws ever nearer, more and more decorative garlands can be seen in shop windows, offices and homes, all adding to the festive scene. OSRAM is now giving Advent an even brighter look. The light from its new LED garland is even whiter than that of similar conventional products. This modern decorative light is suitable for indoors or outdoors. And thanks to its IP 44 protection, it will work reliably outdoors even in the thickest frost. The benefits are impressive:

- Flicker-free snow-white light
- Robust and durable
- Low power consumption

Either 40 or 80 LEDs – with beaming-white, flicker-free light – ensure a pleasant, serene illumination full of atmosphere.

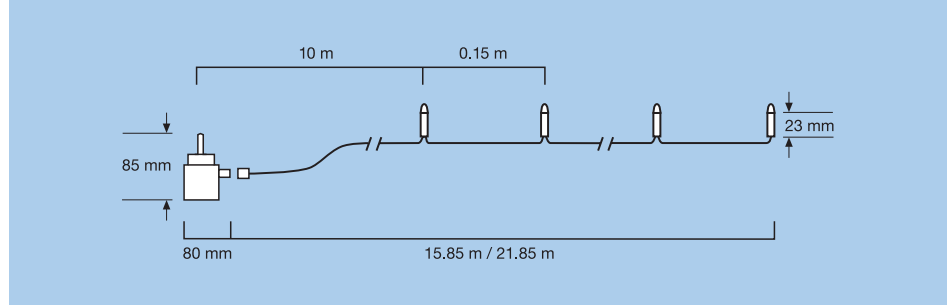

*Gleaming white light for stylish decorations*

*Festive cheer – inside and out*

## Technical data
