

The MINI XENON from OSRAM
puts you in the driving seat.
Even if you're on foot.

The light of a new generation of torches.

SEE THE WORLD IN A NEW LIGHT

OSRAM

The MINI XENON torch.

Brilliant technology and stylish design.

The MINI XENON torch from OSRAM sets new standards in technology and power. With its ultra-modern MINI-WATT XENON lamp, this torch produces pure white light with a brilliance that you would otherwise only see in car headlights.

Like the powerful XENON discharge lamps in vehicle headlights, the XENON light in the MINI XENON has a very high colour temperature and offers unique contour precision and natural colour rendering because its spectrum is so close to that of sunlight. The exceptionally far-reaching high-precision beam is particularly impressive.

The MINIWATT XENON lamp

The filament is almost a perfect point light source and achieves a very high axial luminous intensity in conjunction with the reflector. The result is an even centred illuminated field with minimal scatter losses. With a bulb diameter of just 5 mm, the MINIWATT XENON lamps is much more compact than a comparable halogen lamp;

MINIWATT XENON lamp (original size) compared with a corresponding halogen lamp

the xenon gas inside the lamp guarantees maximum possible output and low power consumption.

The MINI XENON torch with aluminium casing

The elegant and robust aluminium casing of this high-quality designer torch enables the weight to be kept down to an incredible 34 g (without the batteries). And because it is so compact (only 139 mm high and 30 mm in diameter)

it will easily fit into any pocket or bag. The torch has an ergonomically designed rotary switch for changing between floodlight and spotlight.

It prevents the lamp from being switched on accidentally. Two AA batteries (not included) provide long-life power.

The OSRAM MINI XENON torch is available in a blister pack or in an attractive high-quality presentation box.

	MINI XENON
Length	139 mm
Diameter	ø 30 mm
Weight (excl. batteries)	34 g
Single EAN 4050300... Box	789 606
Single EAN 4050300... Blister	767 963
Lamp wattage	2,2 W 2,7 V
Equipped with lamp	64092
Standard pack	6
Batteries required	2 x AA
